Groynes

Things you could think about ???

- Cost
- Environment
- Maintenance
- Life Span

Why should Skegness Council choose Groynes

It stops long shore drift and the beach being eroded. They're cheaper than sea walls.

How can they help keep the coastline safe?

Stops the beach being eroded and stops movement of sediment. Stops the cliff being eroded.

What can they be made from?

wood, metal, rock, bricks,

List two Advantages and two Disadvantages for using Groynes.

Advantages:

- It will stop long shore drift.
- It won't cost much because wood is not expensive

Disadvantages:

- The life span is very short because the wood will wear away
- There is high maintenance and because the sand will build up against it.
