

SECONDARY RESOURCES CATALOGUE

SPRING 2023

The Geographical Association (GA) is the leading subject association for all teachers of geography. Our publications support high-quality geography teaching through engaging content and practical, innovative teaching ideas that have a real impact on learning.

We aim to inspire learners and help them to develop a better understanding and appreciation of the world. To save you time many of our publications include ready-to-use lesson plans, worksheets and supporting resources.

The spring 2023 catalogue includes teaching resources for key stage 3, GCSE and Post-16 written by geography experts. Physical and human geography are covered through a number of topics including glaciation, plate tectonics, rocks, landscapes, distant places, international trade, migration, development, climate change and energy. The catalogue also features a selection of maps, atlases and globes, fieldwork equipment and GIS resources.

Further information and free samples are available at
www.geography.org.uk/shop

Digital option

A range of publications are now available to buy as eBooks in PDF format direct from our shop – go to
www.geography.org.uk/shop

We now also offer site licences for schools/universities wishing to use digital products across their department/institution. For more information email
info@geography.org.uk

CPD Packs

These downloadable packs are designed for teachers to use in-school with their colleagues. Each pack contains a range of practical activities that are flexible to suit your context, the amount of time that you have available and your department or school's needs. The packs contain an overview document with guidance on activities for 15 minutes, one hour or half a day, and have a link to a downloadable folder of accompanying resources.

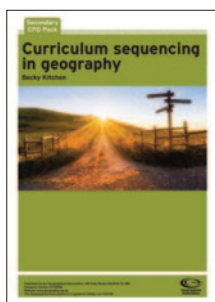

CPD Pack: Assessment and Progression

Becky Kitchen

This secondary geography CPD pack contains guidance and activities on the theme of assessment and progression. The accompanying resources include an article from *Teaching Geography*, a geography assessment and progression PowerPoint, a progression framework, curriculum cards, a mixed constitution of assessment table and a PDF certificate.

PDF eBook ISBN: 978-1-84377-486-0 Price: £23.99 GA members: £16.99

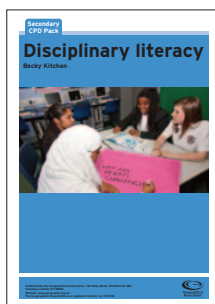

CPD Pack: Curriculum Sequencing in Geography

Becky Kitchen

This secondary geography CPD pack contains guidance and activities on the theme of curriculum sequencing in geography. The accompanying resources include an article from *Teaching Geography*, a curriculum sequencing PowerPoint, a sequencing justification table and a PDF certificate.

PDF eBook ISBN: 978-1-84377-565-2 Price: £23.99 GA members: £16.99

NEW

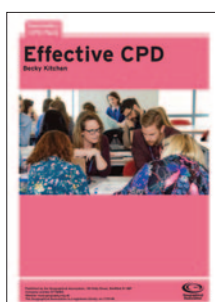

CPD Pack: Disciplinary Literacy

Becky Kitchen

This secondary geography CPD pack provides guidance and activities on the theme of disciplinary literacy. The accompanying resources include a chapter from *The Handbook of Secondary Geography*, a PowerPoint presentation, a RAG rating sheet and a PDF certificate.

PDF eBook ISBN: 978-1-84377-537-9 Price: £23.99 GA members: £16.99

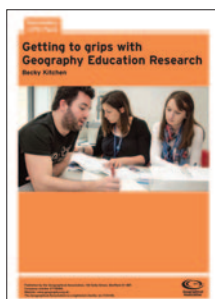

CPD Pack: Effective CPD

Becky Kitchen

This secondary geography CPD pack provides guidance and activities on the theme of effective CPD. The accompanying resources include a chapter from *The Handbook of Secondary Geography*, a PowerPoint presentation, a subject-specific CPD table, a CPD road map and a PDF certificate.

PDF eBook ISBN: 978-1-84377-487-7 Price: £23.99 GA members: £16.99

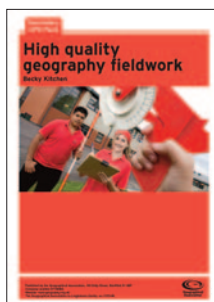

CPD Pack: Getting to Grips with Geography Education Research

Becky Kitchen

This secondary geography CPD pack provides guidance and activities on the theme of geography education research. The accompanying resources include a chapter from *The Handbook of Secondary Geography*, a PowerPoint presentation, relevant articles from *Geography* and *Teaching Geography*, advice on reading geography education research, an example of a research poster and a PDF certificate.

PDF eBook ISBN: 978-1-84377-489-1 Price: £23.99 GA members: £16.99

Professional development

CPD Pack: High Quality Geography Fieldwork

Becky Kitchen

This secondary geography CPD pack contains guidance and activities on the theme of geography fieldwork. The accompanying resources include an article from *Teaching Geography*, a chapter from *The Handbook of Secondary Geography*, a geography fieldwork PowerPoint, a fieldwork strategies handout and a PDF certificate.

PDF eBook

ISBN: 978-1-84377-566-9

KnowHow

Series editor: Richard Bustin

The KnowHow series is designed to help key stage 3 teachers with their background knowledge of geographical themes and topics that they are expected to teach. These PDF downloads provide an introduction to topics in the geography National Curriculum so that teachers can develop their geography teaching with confidence. Each title includes straightforward, accurate and trustworthy background knowledge, explanation, diagrams and a glossary.

KnowHow: Climate Change

Richard Bustin

This title offers clear and concise background information and facts to give you a firm basis for teaching about climate change and for tackling the kinds of questions that students may raise. It provides a solid grounding of climate science and its main implications that can be developed at GCSE and beyond.

PDF eBook ISBN: 978-1-84377-502-7 Price: £6.99 GA members: £4.50

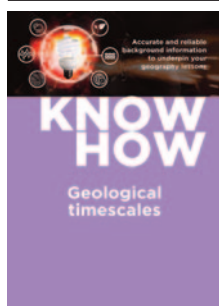

KnowHow: Climate, Soils, Biomes and Vegetation Belts

Simon Collis and Richard Bustin

This title offers clear and concise background information and facts to give you a firm basis for teaching about climate, soils, biomes and different vegetation, and for tackling the kinds of questions that students may raise. It provides a solid grounding of biogeography that can be developed at GCSE and beyond.

PDF eBook ISBN: 978-1-84377-475-4 Price: £6.99 GA members: £4.50

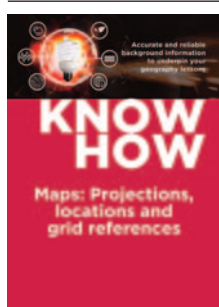

KnowHow: Geological Timescales

Richard Bustin

This title offers clear and concise background information and facts to give you a firm basis for introducing KS3 students to the scale and chronology of broad physical changes to the planet as well as how these are interlinked.

PDF eBook ISBN: 978-1-84377-477-8 Price: £6.99 GA members: £4.50

KnowHow: Maps: Projections, locations and grid references

Margaret Mackintosh, Simon Collis and Richard Bustin

This title offers clear and concise background information and facts to give you the confidence to use, and to teach about using, maps in any appropriate context across the curriculum. Aspects covered include grid references, compass points, latitude and longitude, symbols and keys, scale and map projections.

PDF eBook ISBN: 978-1-84377-476-1 Price: £6.99 GA members: £4.50

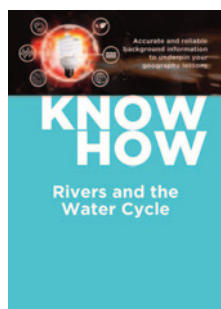

KnowHow: Plastics and Ocean Pollution

Richard Bustin

This title offers clear and concise background information and facts to give you a firm basis for introducing KS3 students to the harmful impact plastic is having on the natural world, and helping them to understand the geographical complexities of the issue.

PDF eBook ISBN: 978-1-84377-501-0 Price: £6.99 GA members: £4.50

Professional development

KnowHow: Rivers and the Water Cycle

Ben Steel and Richard Bustin

This title offers clear and concise background information and facts to give you a firm basis for teaching about rivers and the water cycle, and for tackling the kinds of questions that students may raise. It provides a solid grounding of river features and processes that can be developed at GCSE and beyond.

PDF eBook

ISBN: 978-1-84377-473-0

Price: £6.99

GA members: £4.50

KnowHow: Tectonic Hazards: Volcanoes, earthquakes and tsunamis

Anthony Crewdson, Tony Richardson and Richard Bustin

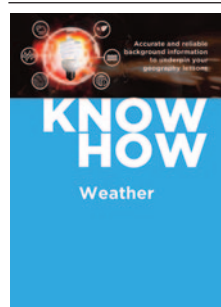

This title offers clear and concise background information and facts to give you a firm basis for teaching about the theory behind volcanoes earthquakes and tsunamis and will give you a solid background for teaching about these powerful forces of nature.

PDF eBook

ISBN: 978-1-84377-474-7

Price: £6.99

A Progression Framework for Geography

John Hopkin with David Gardner, Alan Kinder, Ruth Totterdell and the GA Assessment and Examinations Special Interest Group

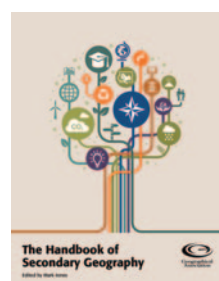

This guidance supports schools in planning for progression, achievement and assessment in geography. It is based on a clear vision of what it means to make progress in geography, anchored by age-specific national expectations. It will support schools in planning a geography curriculum that is ambitious, coherently planned and sequenced, and leads to high standards for their pupils, and support teachers in demonstrating how they connect the intent, implementation and impact of their geography provision.

Planning Your Coherent 11-16 Geography Curriculum: A design toolkit

NEW

David Gardner

This book will help teachers plan a coherent and sequenced secondary geography curriculum for 11-16-year-olds, with progression and assessment at its heart. The first part of the book provides the theoretical underpinning of planning a coherent geography curriculum. The second section provides practical guidance and support, illustrated by case studies from five schools showing how they have developed their curriculums at each stage of the curriculum design process.

Key stage 3/11–14

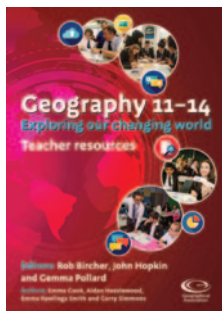

Geography 11–14: Exploring our changing world – student book

Editors: Rob Bircher, John Hopkin and Gemma Pollard

This resource book introduces students in years 7–9 to key geographical concepts, topics, themes, places and skills from the key stage 3 Programme of Study and beyond. The 18 chapters consider themes in human and natural environments and explore the connections and interactions between them. They introduce key geographical knowledge, build understanding and develop skills that will be needed for GCSE, while keeping key stage 3 (or equivalent) a distinctive phase of education.

Paperback student book ISBN: 978-1-84377-509-6 Price: £33.99 GA members: £27.99

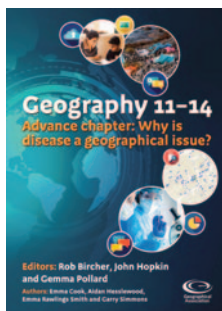

Geography 11–14: Exploring our changing world – teacher resources

Editors: Rob Bircher, John Hopkin and Gemma Pollard

These resources accompany the *Geography 11–14 student book* that introduces students in years 7–9 to key geographical concepts, topics, themes, places and skills from the key stage 3 Programme of Study and beyond. The teacher resources contain:

- a medium-term plan and guidance notes for each chapter, including information on how to teach the topic, the geography of the topic, prior and future learning, and links to further information.
- activity, information and answer sheets that can be used to complete or expand on the book activities.
- a PowerPoint of resources for each chapter including larger versions of the main chapter images, key terms and definitions, and useful web links.

PDF eBook ISBN: 978-1-84377-512-6 Price: £130 GA members: £120

Geography 11–14: Exploring our changing world – advance chapter

Editors: Rob Bircher, John Hopkin and Gemma Pollard

This PDF chapter provides an ideal introduction to the Geography 11–14 resources. Focusing on the geographies of health and disease, it showcases the types of material found in the main student book and teacher resources while providing an interesting and useful unit of work in itself.

Key Stage 3 Geography Teacher's Toolkit

Series editors: Alan Kinder and John Widdowson

This series is designed to help teach a fresh, broad and balanced key stage 3 curriculum. It uses key geographical concepts and skills to explore new places, themes and issues. Each title provides ten lesson plans and all the resources needed to teach 'out of the box', including information, images and activity sheets, as well as idea to adapt and extend the unit.

Mind the Gap: How is development changing in Southeast Asia and beyond?

Michelle Minton

This unit critically considers how development can be defined and measured, why development is unequal and who is responsible for it. It focuses on present and future development in Southeast Asia.

Paperback ISBN: 978-1-84377-374-0 Price: £23.99 GA members: £18.99

Key stage 3/11–14

Going to Extremes: What makes weather and climate so extreme?

Garry Simmons

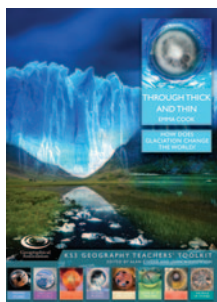

Using locations in Russia, India and Ethiopia, this unit will help students to develop their understanding of meteorological processes and the impacts of weather and climate, as well as interpret weather charts and use GIS.

Paperback

ISBN: 978-1-84377-375-7

Price: £23.99

GA members: £18.99

Through Thick and Thin: How does glaciation change the world?

Emma Cook

This unit will provide students with a broad overview of glaciation within contrasting global contexts. Students will develop their understanding of both physical and human geography in icy and glacial environments.

Paperback

ISBN: 978-1-84377-351-1

Price: £23.99

GA members: £18.99

What's the Use? How can Earth meet our resource needs?

Richard Bustin

This unit focuses on a wide range of resources, from oil in Russia and the Arctic, water in Kenya, timber in the Amazon and land in Wales, to tuna in the Indian Ocean and diamonds in Sierra Leone.

Paperback

ISBN: 978-1-84377-350-4

Price: £23.99

GA members: £18.99

A Thorny Issue: Should I buy a Valentine's rose?

Louise Ellis

With a focus on Kenya's flower industry, this unit examines how trade affects the lives of people and impacts on the landscape and environment.

Paperback

ISBN: 978-1-84377-218-7

Price: £23.99

GCSE Geography Teachers' Toolkit

Series Editors: Ruth Totterdell, Justin Woolliscroft and Jane Ferretti

Take a fresh look at GCSE geography in your classroom and enthuse, engage and motivate your students, equipping them with the skills and knowledge to tackle their GCSE examinations. Each toolkit contains ten fully-worked lesson plans; all the resources needed for each lesson plan, including information, photosets, PowerPoints and activity sheets (available to download from a password protected area of the GA website); background to the topic, a medium-term plan, glossary, and links to further ideas and resources and a practice GCSE question with mark scheme for each lesson.

Revision: A structured approach

Catherine Owen and Sebastian Wits

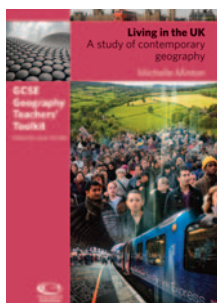

This Toolkit supports geography teachers in preparing their students for the GCSE geography exams. It can be used flexibly, either alongside the whole GCSE course or to help support students in revision lessons at the end of the course. It is organised around the themes of the DfE core content required in all the GCSE specifications. Seven content topics, plus geographical skills, fieldwork and case studies, are each covered by three lessons and a PowerPoint presentation. Key resources for the lessons can be printed from the PowerPoint or the activity sheets, both available to download from the online resources.

Paperback

ISBN: 978-1-84377-429-7

Price: £23.99

GA members: £18.99

Living in the UK: A study of contemporary geography

Michelle Minton

This title encourages students to delve into the geography of the UK across a range of scales and through a variety of lenses. Each lesson adopts a specific theme drawn from the GCSE specifications. They explore a variety of contrasting places across the UK, each with its own unique geographical landscape and history, including: urban challenges and opportunities in Birmingham, Leeds and London; rural change in Hawes, North Yorkshire; and sustainable living in Bristol.

Paperback

ISBN: 978-1-84377-416-7

Price: £23.99

GA members: £18.99

Food, Water and Energy: A study of resource management

Gemma Pollard

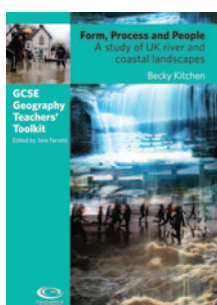

All GCSE specifications include a study of at least one natural resource: food, energy or water. This toolkit provides a range of fully-resourced and creative lesson ideas to enable teachers to explore these as separate issues, or to consider their interdependence. Students will need to develop a deep understanding of the issues, for example looking at trends in resource supply and demand, unequal access to resources, or how food, energy and water security can be ensured in the future. Issues of sustainability will be particularly important.

Paperback

ISBN: 978-1-84377-411-2

Price: £23.99

GA members: £18.99

Form, Process and People: A study of UK river and coastal landscapes

Rebecca Kitchen

Written specifically to support the UK landscapes component of the GCSE specifications, this toolkit opens with an overview, explicitly linking the underlying geology of the UK with the resulting landscapes, then examines the processes and landforms characteristic of rivers and coasts. Human management of these landscapes is also considered and there are opportunities for building detailed case studies of a UK river and of the coastal management of Lyme Regis. It concludes with a lesson that explores how landscapes change over time and the potential influence of climate change on the UK's rivers and coasts.

Key stage 4/GCSE/14–16

Going Global? A study of our interconnected world

Catherine Owen

In studying the themes of globalisation and interdependence, students reflect on their place in a globalised world. They then consider experiences of cultural and economic globalisation in countries at different stages of development, focusing on China, the UK and Kenya.

Paperback ISBN: 978-1-84377-263-7 Price: £23.99 GA members: £18.99

Hot and Bothered? A study of climate change

David Rayner

The huge topical issue of climate change is common to many GCSE specifications and can be tackled from many different angles and at many different scales. Here, students investigate causes of natural climate change before assessing human impact and the local and global consequences.

Paperback ISBN: 978-1-84377-264-4 Price: £23.99 GA members: £18.99

Is the Future Sussed? A study of sustainable urban living

John Widdowson

Students consider the concept of sustainable development by assessing the sustainability of a typical British town and applying the technique to their own place. They are introduced to the idea of an urban footprint and explore the issue of transport by undertaking local fieldwork.

Paperback ISBN: 978-1-84377-261-3 Price: £23.99 GA members: £18.99

Life on the Edge? A study of extreme environments

Jane Ferretti and Ruth Totterdell

Through a series of case studies students explore extremely hot, dry and cold environments and consider the cause of their extremity, the effects of the environment on life within them and the effects of human action on the environment.

Paperback ISBN: 978-1-84377-266-8 Price: £23.99 GA members: £18.99

A Disposable Future? A study of a wasteful world

Louise Ellis, James McDaid and Andrew Oraeki

Waste management and disposal is a local and global political issue. In grappling with the complexity of the consumption and disposal of goods, students examine different methods of waste management and issues surrounding different types of waste.

Paperback ISBN: 978-1-84377-265-1 Price: £23.99 GA members: £18.99

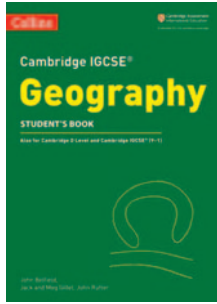

For Richer and Poorer? A study of uneven development

Paula Cooper

Students explore their perceptions and construct their own definition of uneven development by interrogating evidence. They then apply their understanding to suggest ways of reducing uneven development and evaluate the Millennium Development Goals and real examples of aid.

Paperback ISBN: 978-1-84377-262-0 Price: £23.99 GA members: £18.99

Key stage 4/GCSE/14–16

Collins Cambridge IGCSE Student's Book and Teacher's Guide (third editions)

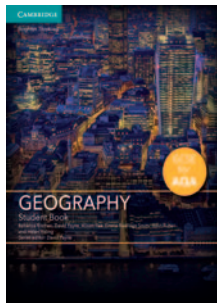

Teacher's Guide: John Belfield, Alan Parkinson, Alison Rae and John Rutter

Student's Book: John Belfield, Jack Gillett, Meg Gillett and John Rutter

The Collins Cambridge IGCSE Geography Student's Book has been fully updated to cover the Cambridge IGCSE Geography (0460) syllabus and Cambridge O-Level syllabus (2217) for first teaching in 2018 and first examination in 2020. Its in-depth content is presented in a clear and easily accessible format, and is comprehensively supported by the Teacher's Guide. Both books have been written in partnership with the GA.

Student's Book paperback ISBN: 978-0-00-826015-6 Price: £24.99 GA member: £20.99

Teacher's Guide paperback ISBN: 978-0-00-826016-3 Price: £100.00 GA member: £94.99

GCSE Geography for AQA Student Book

Rebecca Kitchen, David Payne, Alison Rae, Emma Rawlings Smith, John Rutter, Helen Young, John Pallister

Written for the AQA GCSE geography specification for first teaching from 2016, this Student Book fully covers the new AQA GCSE geography qualification. This full-colour book includes differentiated activities providing support for weaker students and stretch for more able students, 'test your progress' pages, a dedicated section on skills development and specially written decision-making exercises. Published by Cambridge University Press in partnership with the Geographical Association.

Paperback ISBN: 978-1-3166-0463-2 Price: £28.25 GA members: £27.50

Key stage 5/A level/Post-16

Top Spec Geography

Series Editors: Bob Digby and Sue Warn

These cutting-edge resources for post-16 students investigate specialist geography topics from the A level specifications and help to bridge the gap between A level and university. They offer the latest research on a wide variety of human and physical geography topics in an easy-to-understand format. Each book is supported by online materials including further information, extended glossaries and web links. This contemporary and exciting geography will enthuse your students and enrich their work.

Changing Places

Emma Rawlings Smith, Simon Oakes and Alastair Owens

This book considers how meanings and representations attached to places help shape human actions and behaviours that affect places, and discusses how relationships that exist between people, economy, society and environment can explain why places are constantly changing.

Paperback ISBN: 978-1-84377-380-1 **Price: £27.99** **GA members: £21.50**
Set of six ISBN: 978-1-84377-391-7 **Price: £134.99** **GA members: £104.99**

Coasts

Debbie Milton and Gerd Masselink

Coasts are a very popular option within the 'Landform systems' compulsory core of all four A level specifications. This book will help move your thinking to a higher level by placing coasts within a scientific systems-based approach. It considers coastal systems and processes, rocky and depositional coasts, sea-level change and coastal response, and coastal management.

Paperback ISBN: 978-1-84377-412-9 **Price: £27.99** **GA members: £21.50**
Set of six ISBN: 978-1-84377-413-6 **Price: £134.99** **GA members: £104.99**

Emerging Superpowers: India and China (second edition)

Gill Miller

This new edition has been fully updated to meet the requirements of the 2016 A levels in England and Wales. It considers issues such as the rapid economic growth of both countries, the implications for people and the environment, the shift from rural to urban populations, and each country's role in global geopolitics. The book will also provide background reading for those undertaking individual investigations on international geopolitical change.

Paperback ISBN: 978-1-84377-414-3 **Price: £27.99** **GA members: £21.50**
Set of six ISBN: 978-1-84377-415-0 **Price: £134.99** **GA members: £104.99**

Glaciated Landscapes

Richard Waller and Peter Knight

This book identifies the key geographical issues that can be explored through a case study of glaciation. It describes the different types of glaciers, explores the mechanisms of glacier motion, considers specific landforms, landscapes and landsystems associated with different glacial environments, and describes how processes and materials in glacial landsystems can create both opportunities and hazards for humans.

Paperback ISBN: 978-1-84377-409-9 **Price: £27.99** **GA members: £21.50**
Set of six ISBN: 978-1-84377-410-5 **Price: £134.99** **GA members: £104.99**

Health Geographies and the COVID-19 Pandemic

Bob Digby and Tony Gatrell

This book explores the development and spread of the virus (SARS-CoV-2) and the accompanying disease (COVID-19). It discusses the impacts of the disease globally and in specific countries such as Brazil, the USA and the UK. It also investigates access to vaccination in different parts of the world, and helps to identify themes by which students might investigate COVID-related topics in their coursework.

Paperback ISBN: 978-1-84377-519-5 **Price: £27.99** **GA members: £21.50**
Set of six ISBN: 978-1-84377-542-3 **Price: £134.99** **GA members: £104.99**

NEW

Key stage 5/A level/Post-16

Migration and Global Governance

Katie Willis and Paul Wraight

Migration is a globally significant process, and is important for its connections to the key geographical themes of demographic, economic and social change, inequality and urbanisation. This book covers migration as a response to demographics and economic development; how global governance shapes migration, such as flows of refugees; the theoretical background to migration; the consequences of migration for host and source countries; why migration can be contested, through concepts such as multiculturalism, nationalism and populism; and how human experiences of migration vary.

Tectonic Hazards (second edition)

Martin Degg and Sue Warn

This completely revised and updated book will extend your understanding of the physical and human processes that combine to create tectonic risks and disasters from the global to the local level. It explores the relationships between tectonic hazard, vulnerability, resilience and risk; the distribution of hazards; factors that impact on human vulnerability to tectonic hazards; protection, adaptation and mitigation measures and the future of disaster risk management

The Climate Crisis

Tim Daley and Kate Stockings

This book offers an in-depth view of the climate crisis: its origins, the main drivers, its impacts, and some proposed solutions. Among other things, it: explores the meaning of a climate 'crisis'; discusses how the concept has arisen as scientists gain increasing confidence in the data signalling dramatic changes in global climate systems; examines the causes of the crisis and assesses the impacts, both now and in the future; and considers why the nature of the crisis is complex, and how any solutions may need to be radical, e.g. in energy production and use.

Water and Carbon Cycles

Russell Chapman and Sara Thornton

This book provides an up-to-date exploration of the changes in the water and carbon cycles brought about by human actions. Focusing on the contrasting ecosystems of tropical peatlands and Arctic tundra, it provides in-depth analysis of the impact of these changes on the working of the cycles. Students are introduced to new case studies based on the authors' own research, and the accompanying diagrams, maps and photographs will enhance their understanding.

Key stage 5/A level/Post-16

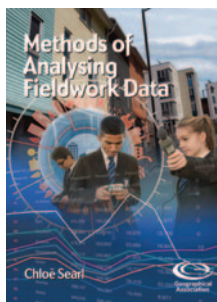

Methods of Collecting Fieldwork Data

Chloë Searl

This book aims to help both students and teachers select the most suitable methods for collecting qualitative and quantitative data. The advantages and disadvantages of each method are discussed, and there is extensive advice on how to get the most from collecting data using GIS. The wider principles of data collection are also explored, giving the reader the context in which the methods are applied and helping them to see the high level of planning needed before they take their clipboard into the field. The book also features additional downloadable content.

Paperback (single copy) ISBN: 978-1-84377-496-9 Price: £23.99 GA members: £18.99
Paperback (set of six) ISBN: 978-1-84377-522-5 Price: £120.00 GA members: £94.00

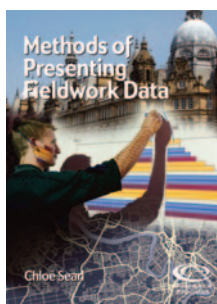

Methods of Analysing Fieldwork Data

Chloë Searl

This book aims to help both students and teachers select the most suitable methods for analysing qualitative and quantitative data. Each method supports geography students through the process using a step-by-step guide and a worked example. The wider principles of data analysis are also explored, giving the reader the context in which the methods are applied and helping them to understand the contrasts between methods and how appropriate they are for different geographical studies. The book also features additional downloadable content.

Paperback (single copy) ISBN: 978-1-84377-494-5 Price: £23.99 GA members: £18.99
Paperback (set of six) ISBN: 978-1-84377-523-2 Price: £120.00 GA members: £94.00

Methods of Presenting Fieldwork Data

Chloë Searl

This book aims to help both students and teachers select the most suitable methods for presenting qualitative and quantitative data. The advantages and disadvantages of each method are discussed, and there is extensive advice on how to get the most from presenting data using GIS. The wider principles of data presentation are also explored, giving the reader the context in which the methods are applied and helping them to understand the differences between the methods and their relative appropriateness for a range of studies. The book also features additional downloadable content.

Fieldwork at A level: Your guide to the independent investigation

Edited by Simon Oakes

Written in partnership with the Field Studies Council, this reference book for A level students will support them through their independent investigation. It is structured around the enquiry cycle and includes a range of the qualitative and quantitative skills that students will need to use in their investigation. It will help students to develop an understanding of fieldwork, IT and GIS skills and how to use them effectively in their investigation. Further support is provided by downloadable technique and skills sheets.

Paperback ISBN: 978-1-84377-418-1 Price: £22.99 GA members: £17.99

Fieldwork at A level Special Offer

Key stage 5/A level/Post-16

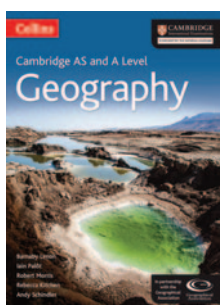

A/AS Level Geography for AQA Student Book

Ann Bowen, Andy Day, Victoria Ellis, Paul Hunt, Rebecca Kitchen, Claire Kyndt, Garrett Nagle, Nicola Walshe, Helen Young

This full-colour student book covers all core and optional units for the AQA 2016 AS and A Level geography specification. Students are encouraged to develop links between physical and human topics, understand systems, processes, and acquire geographical skills. Helping to bridge the gap from GCSE to A Level, it also provides support for fieldwork skills and for the geographical investigation at A Level. Published by Cambridge University Press in partnership with the Geographical Association.

Paperback ISBN: 9781316606322 Price: £43.25 GA members: £38.99

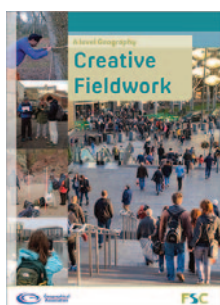

Cambridge AS and A Level Geography Student Book

Barnaby Lenon, Iain Palôt, Robert Morris, Rebecca Kitchen and Andy Schindler

This student book covers all the required Cambridge A and AS level International geography core syllabus topics as well as the physical and human geography options. The content is accessible and clearly organised with a student-friendly layout, and the depth of coverage is suitable for the whole range of abilities. Illustrated throughout, it contains a wealth of maps, diagrams and info-graphics to support the interesting and topical case studies taken from around the world. Published by Collins in partnership with the Geographical Association.

Paperback ISBN: 978-0-00-812422-9 Price: £35.00 GA members: £32.99

Creative Fieldwork

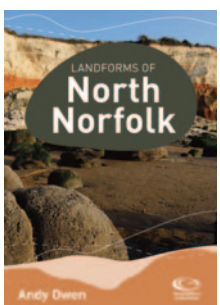

Janine Maddison

This book contains ideas for 11 innovative approaches to fieldwork in A level geography. From physical themes (such as calculating the carbon content of trees, cliff surveys, Hudson's equation for evaluating coastal defences) to human themes (such as smell mapping, mood mapping, visual methods, coding of diaries), each fieldwork method has been tested and refined with A level students at FSC Field Centres. Produced by the Field Studies Council in partnership with the Geographical Association.

Paperback ISBN: 978-1-84377-430-3 Price: £7.00 GA members: £6.00

Landforms of...

Each guide in this series provides an overview of the key geographical landforms of the region, the processes that formed them and the underlying geology. The guides describe the landforms and exemplify key geomorphological processes using clear, non-technical language supported by photographs, diagrams and maps. They can be used in the planning and preparation for field visits and for follow-up classroom learning and activities.

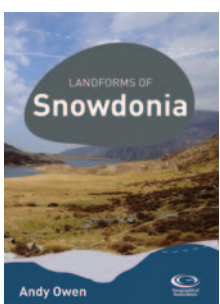

Landforms of North Norfolk

Andy Owen

This guide describes classic depositional and erosional landforms of the North Norfolk coast such as Blakeney Spit and the cliffs of Hunstanton and West Runton. The importance of the Ice Age in influencing the present-day landscape of this region is also explained.

Paperback ISBN: 978-1-84377-525-6 Price: £14.99 GA members: £11.50

NEW

Landforms of Snowdonia

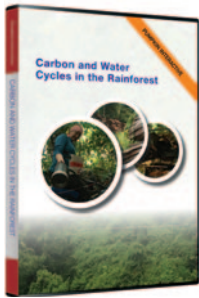

Andy Owen

This guide describes classic glacial landscapes of Snowdonia's National Park including the cirques of Cadair Idris and the Glyderau range and the moraines of Cwm Idwal. The development of depositional coastal landforms at Morfa Dyffryn and Morfa Harlech is also explored.

Paperback ISBN: 978-1-84377-526-3 Price: £14.99 GA members: £11.50

NEW

Each DVD, suitable for key stage 4–5 students, is about 30 minutes long and comes with a fantastic bank of teacher resources and student activities. Many more titles are available on the GA online shop.

Carbon and Water Cycles in the Rainforest

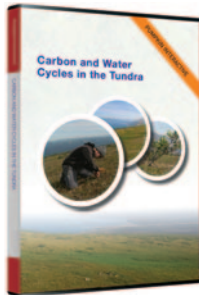

Focusing on the Amazon and Borneo, this film illustrates and explains the key environmental land-use changes occurring in tropical rainforests and the effect this is having on the carbon and water cycles.

GA Streaming Library: annual subscription

The GA has partnered with Pumpkin Interactive to bring you a streaming library containing over 50 award-winning video-rich geography resources. From the Amazon rainforest to the Sahara Desert, Haiti's earthquake and Iceland's volcanoes, Pumpkin's dedicated team brings you case studies filmed around the world. The titles are continually updated and all of them are made in consultation with textbook author Bob Digby. They meet the requirements of the UK's main awarding bodies and give your students access to the latest case studies and geographical thinking.

What you get from the streaming library:

- Access to more than 50 resources on the site.
- Private links enabling you to share all video content with your students.
- Extensive teachers' notes and activities written by Bob Digby.
- Instant access to new resources and updates.

Fieldwork resources

A Guide to Fieldwork in...

This series of eBooks provides support and guidance on urban fieldwork opportunities in a number of cities, focusing on 'changing places'. Aligned with the GCSE specifications, the books are only available as downloadable pdfs and each title includes the routes of three fieldwork walks in the city; the theoretical context for the fieldwork in the area; locations for physical geography fieldwork in the area, a list of appropriate fieldwork techniques; and worksheets and logging sheets.

A Guide to Fieldwork in Birmingham

Andy Owen

This title provides guidance on undertaking urban fieldwork in Birmingham, outlining three different routes: Jewellery Quarter to Mailbox; Victoria Square to Five Ways; and New Street to Eastside. For each route there is theoretical context of fieldwork in the area. The book also provides ideas for physical geography locations and opportunities, and suggestions for fieldwork techniques.

PDF eBook ISBN: 978-1-84377-460-0 Price: £12.99 GA members: £10.99

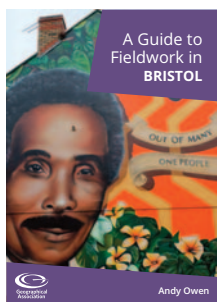

A Guide to Fieldwork in Brighton

Andy Owen

This title includes the routes of three fieldwork walks in Brighton: a circuit of North Laine; the New England Quarter and London Road; Seven Dials. The book also provides the theoretical context for the fieldwork in the area; locations for physical geography fieldwork in the area; a list of appropriate fieldwork techniques; worksheets and logging sheets.

NEW

Fieldwork Through Enquiry (second edition)

Alan Parkinson and John Widdowson

The second edition of this popular title provides ten updated and new examples of enquiry-based fieldwork projects in urban, rural and coastal locations. Each chapter is supported by pdf and Word versions of student resource sheets (available to download from the GA website). The new edition also includes practise exam-style questions, is mapped against current GCSE specification requirements and includes the use of GIS and creative approaches to fieldwork.

Paperback ISBN: 978-1-84377-459-4 Price: £27.99 GA members: £19.99

Methods of Collecting Fieldwork Data

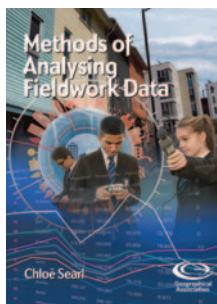

Chloë Searl

This book aims to help both students and teachers select the most suitable methods for collecting qualitative and quantitative data. The advantages and disadvantages of each method are discussed, and there is extensive advice on how to get the most from collecting data using GIS. The wider principles of data collection are also explored, giving the reader the context in which the methods are applied and helping them to see the high level of planning needed before they take their clipboard into the field. The book also features additional downloadable content.

Paperback (single copy) ISBN: 978-1-84377-496-9 Price: £23.99 GA members: £18.99

Paperback (set of six) ISBN: 978-1-84377-522-5 Price: £120.00 GA members: £94.00

Fieldwork resources

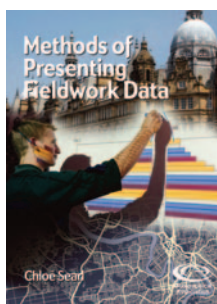

Methods of Analysing Fieldwork Data

Chloë Searl

This book aims to help both students and teachers select the most suitable methods for analysing qualitative and quantitative data. Each method supports geography students through the process using a step-by-step guide and a worked example. The wider principles of data analysis are also explored, giving the reader the context in which the methods are applied and helping them to understand the contrasts between methods and how appropriate they are for different geographical studies. The book also features additional downloadable content.

Paperback (single copy) ISBN: 978-1-84377-494-5 Price: £23.99 GA members: £18.99
Paperback (set of six) ISBN: 978-1-84377-523-2 Price: £120.00 GA members: £94.00

Methods of Presenting Fieldwork Data

Chloë Searl

This book aims to help both students and teachers select the most suitable methods for presenting qualitative and quantitative data. The advantages and disadvantages of each method are discussed, and there is extensive advice on how to get the most from presenting data using GIS. The wider principles of data presentation are also explored, giving the reader the context in which the methods are applied and helping them to understand the differences between the methods and their relative appropriateness for a range of studies. The book also features additional downloadable content.

Paperback (single copy) ISBN: 978-1-84377-495-2 Price: £23.99 GA members: £18.99
Paperback (set of six) ISBN: 978-1-84377-524-9 Price: £120.00 GA members: £94.00

Fieldwork at A level: Your guide to the independent investigation

Edited by Simon Oakes

Written in partnership with the Field Studies Council, this reference book for A level students will support them through their independent investigation. It is structured around the enquiry cycle and includes a range of the qualitative and quantitative skills that students will need to use in their investigation. It will help students to develop an understanding of fieldwork, IT and GIS skills and how to use them effectively in their investigation. Further support is provided by downloadable technique and skills sheets.

Paperback ISBN: 978-1-84377-418-1 **Price: £22.99** GA members: £17.99

Fieldwork posters (set of five)

Each of the posters in this new collection contains 25 useful examples of different aspects of fieldwork, from developing a question for enquiry, to choosing a location and working out the best equipment to use. These attractive A2 posters will provide classroom inspiration and support on the following themes: reasons to do fieldwork; fieldwork locations; fieldwork investigations; fieldwork equipment; fieldwork techniques.

Set of five ISBN: 978-1-84377-458-7 **Price: £20.99** GA members: £16.99

Fieldwork resources

Creative Fieldwork

Janine Maddison

This book contains ideas for 11 innovative approaches to fieldwork in A level geography. From physical themes (such as calculating the carbon content of trees, cliff surveys, Hudson's equation for evaluating coastal defences) to human themes (such as smell mapping, mood mapping, visual methods, coding of diaries), each fieldwork method has been tested and refined with A level students at FSC Field Centres. Produced by the Field Studies Council in partnership with the Geographical Association.

Paperback ISBN: 978-1-84377-430-3 Price: £7.00 GA members: £6.00

Foldout fieldwork guides

Field Studies Council

Aimed at GCSE and A level, this series of fold-out charts have been designed for independent student use in the field or in the classroom.

Playing Field Plants ISBN: 978-1-85153-293-3 Price: £4.99 GA members: £3.99
